“After the Storm”
3.1.12

ANNOUNCER:

Before you start any clean up or repair project after a storm that requires digging please remember to contact JULIE. Even if you're replacing an item in its original location such as a fence post, tree or shrub you could be at risk. Simply going down a bit deeper or to the left or right you could damage a utility line. It's happened before and it could happen to you. Don't add additional damage to a storm's destruction.

Be safe when you dig, contact JULIE. Simply call 811 or go online at illinois1call.com. That's 811 or illinois1call.com.
