

[:30 After The Storm Script](#)

Cleaning up or starting a repairing project after a storm? Remember to contact JULIE before you dig. Even if you're replacing an item like a fence post, tree or shrub in its original location, you could be at risk. Simply digging a bit deeper or to the left or right could damage an underground utility line. It's happened before and it could happen to you. Don't add additional damage to a storm's destruction.

Stay safe. Contact JULIE Before You Dig dot com or call 811.
