Overview

As has been announced, JULIE will be partnering with One Call Concepts to provide a new software platforms for their CSRs, Excavators, and Member Utilities.

Along with this new platform, locate requests will be changing formats. To accommodate this change, JULIE will be sending test tickets to your current receiving method/endpoint. The specific changes and the testing process will be outlined below.

Return to Top

This document is split into the following sections:

Explanation of the testing process

A list of the delivery and access options

Breakdown of headers and revisions types

End-of-day Audits – explanation and examples

Ticket Formats – formats and examples

Testing Process

The basics of JULIE's testing process is to transmit non-billable test tickets of all types to all members to simulate all possible scenarios.

All emails will come from **the following emails:**

julie@occinc.com – Production environment
julie@uat.occinc.com – User Testing environment
julie@sb.occinc.com – Sandbox Testing environment

A response is needed on all these tickets, so please make all efforts to communicate that you have received these tickets.

JULIE's new software automatically tracks responses, allowing call center staff to follow up with members and provide personalized troubleshooting when needed.

Delivery and Access Options

JULIE supports the following ticket delivery and access options:

- Email
- Fax
- SFTP
- SMS
- Voice Out
- Web / Locator Tickets (requires a member contract with OCC)

For email IP addresses to whitelist or public keys needed to receive tickets via SFTP, contact JULIE Member Services at **memberinfo@julie1call.com**.

Return to Top

Ticket Types – Headers and Revision Types

The **ticket header** identifies the ticket's general type, while the **Action/Revision type** identifies the specific action associated with a given transmission, such as New Ticket, Re-Mark, or Cancel.

Every ticket transmission must include both a **ticket header** and an **Action/Revision type**. Together, these values identify what is being transmitted—for example, **Normal – New Ticket** or **Normal – Re-Mark**.

Ticket Headers and Keys

A ticket header is the basic categorization of a ticket that denotes certain rules and requirements needed when submitting a locate request.

For example, a Joint Meet ticket will require a meet location to be filled out during ticket submission, but a Normal ticket will not have those fields at all. The full list along with its Audit Key (how it is shown in the daily audit) is as follows:

Ticket Header	Header ID	Audit Key
NORMAL	0	NRML
EMERGENCY - NOW	1	EMER
EMERGENCY - RUSH	2	RUSH
EMERGENCY - SHORT	3	SHORT
DAMAGE	4	DAMG
EXPOSED LINE	5	EXPS
PLANNING DESIGN REQUEST	6	PLAN
PLANNING DESIGN LOCATE REQUEST	7	PDLR
JOINT MEET	8	MEET

Return to Top

Ticket Actions/Revision Types

Ticket headers generally represent a ticket's type, but ticket Actions/Revisions represent the specific

For example, a New Ticket was created from scratch by an excavator or CSR, but an Extension is an existing ticket that was then reprocessed to extend its timespan. See the table below for every JULIE ticket action/revision.

Revision/Action	Audit Key	Expected Ticket Number Behavior
NEW TICKET	NEW	Creates a unique ticket number
CANCEL	CANC	Retains existing ticket number
DAMAGE	DAMG	Revision of existing ticket or new notice
EXPOSED LINE	EXPS	Revision of existing ticket or new notice
EXTENSION	EXTN	Creates new ticket number; references previous ticket
INCOMPLETE	INCO	Retains existing ticket number
NON RESPONSE	NRES	Retains existing ticket number
RE-MARK	RMRK	Creates new ticket number; references previous ticket
RETRANSMIT	RETX	Retains existing ticket number
RESEND	RSND	Transmission revision only; retains existing ticket number
TICKET TALK MESSAGE	TTLK	Retains existing ticket number
PIGGY BACK	PIGB	Creates new independent ticket number

End-of-Day Audits

At the end of every day, JULIE will send each member utility an audit containing a summary of all tickets received by district during that day.

Audits can be sent in several formats:

Return to Top

END-OF-DAY AUDIT FORMAT: TEXT (default)

END-OF-DAY AUDIT FORMAT: JSON

END-OF-DAY AUDIT FORMAT: XML

Audits can also be customized to display the information you find most helpful:

- Header (only shows the ticket header)
- Revision (only shows the revision type)
- Header-revision (shows both)

Regardless of the format, audits will always contain:

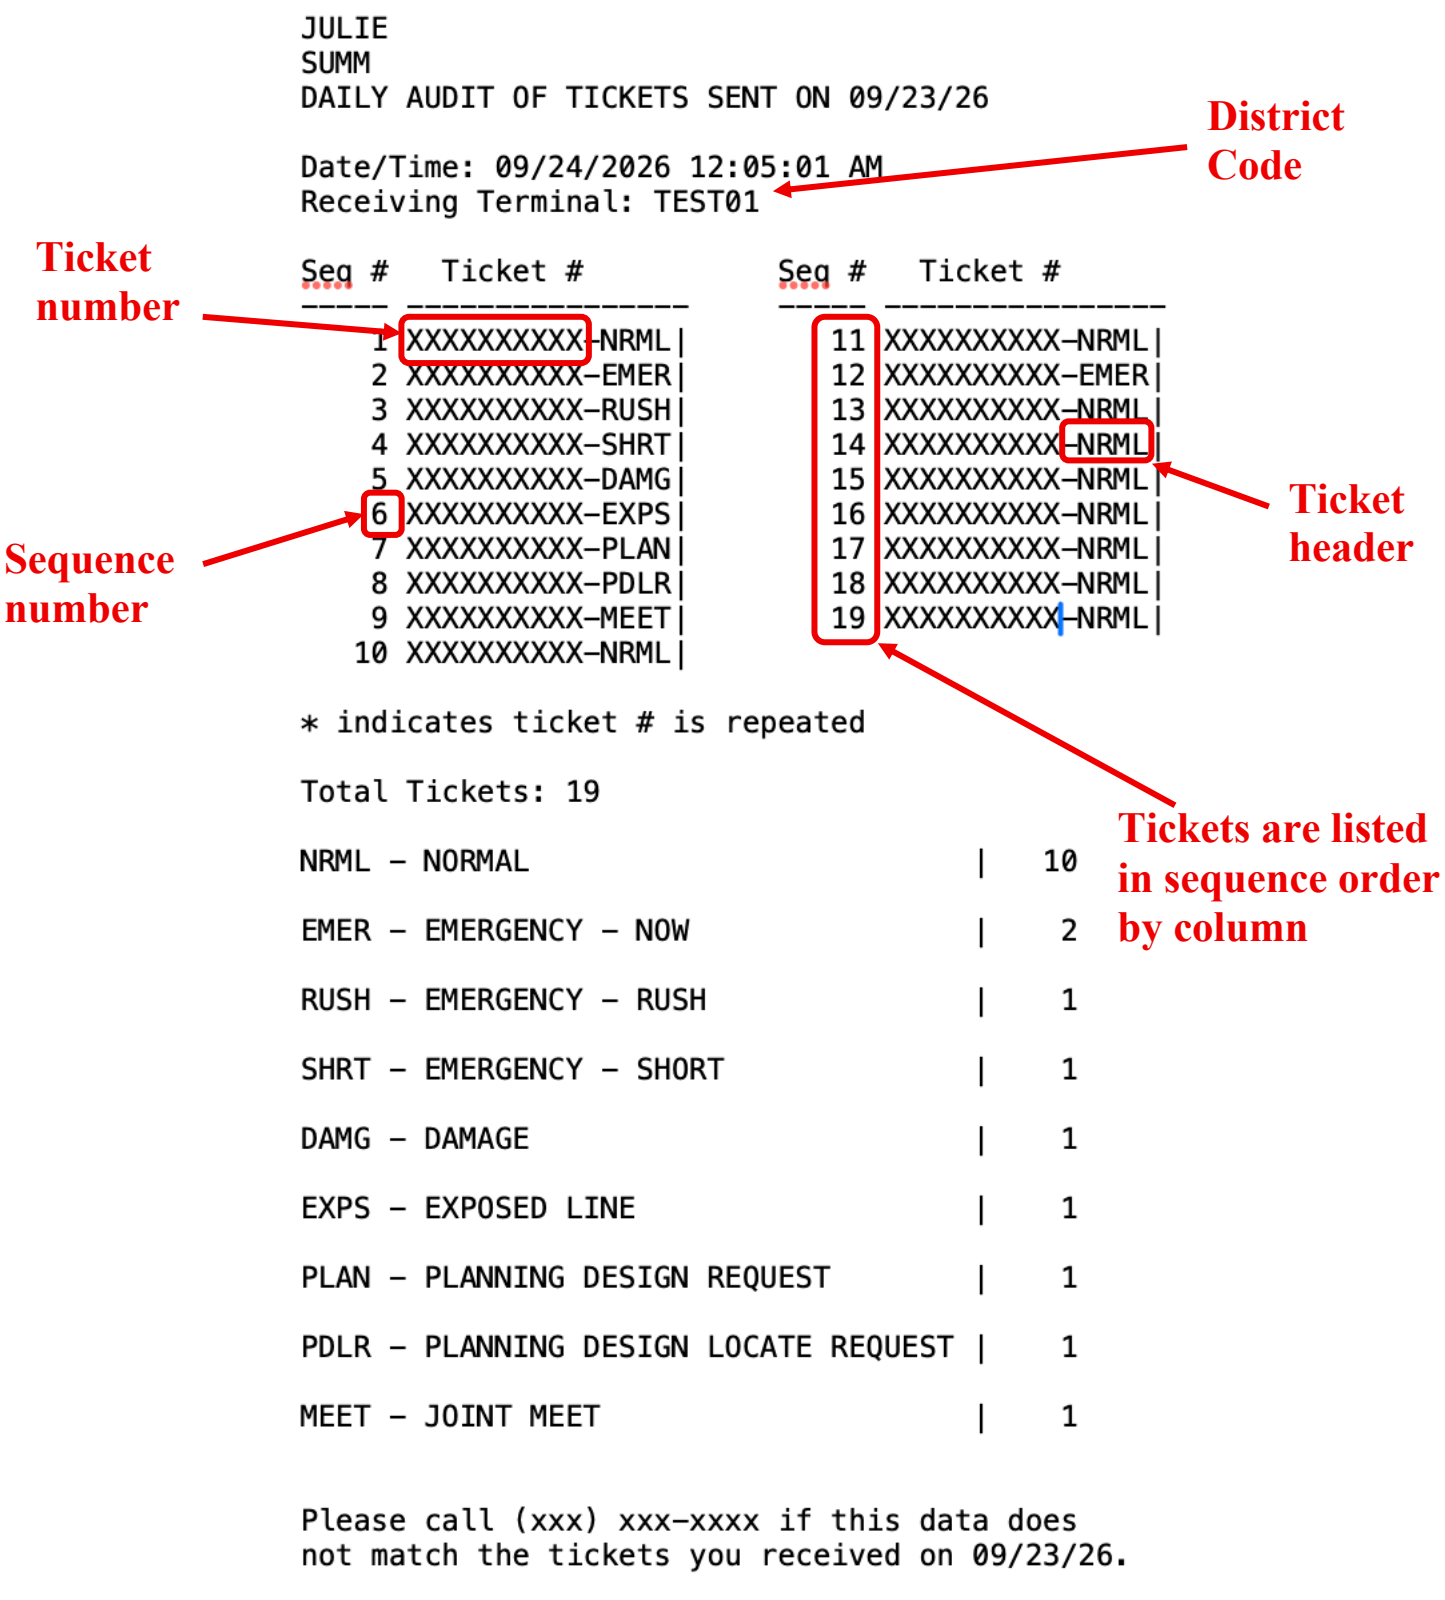

- Ticket number
- Sequence number (order it was received in)
- Total tickets received
- Total tickets by header, revision, or each combination

EXAMPLE END-OF-DAY AUDIT FORMAT: TEXT

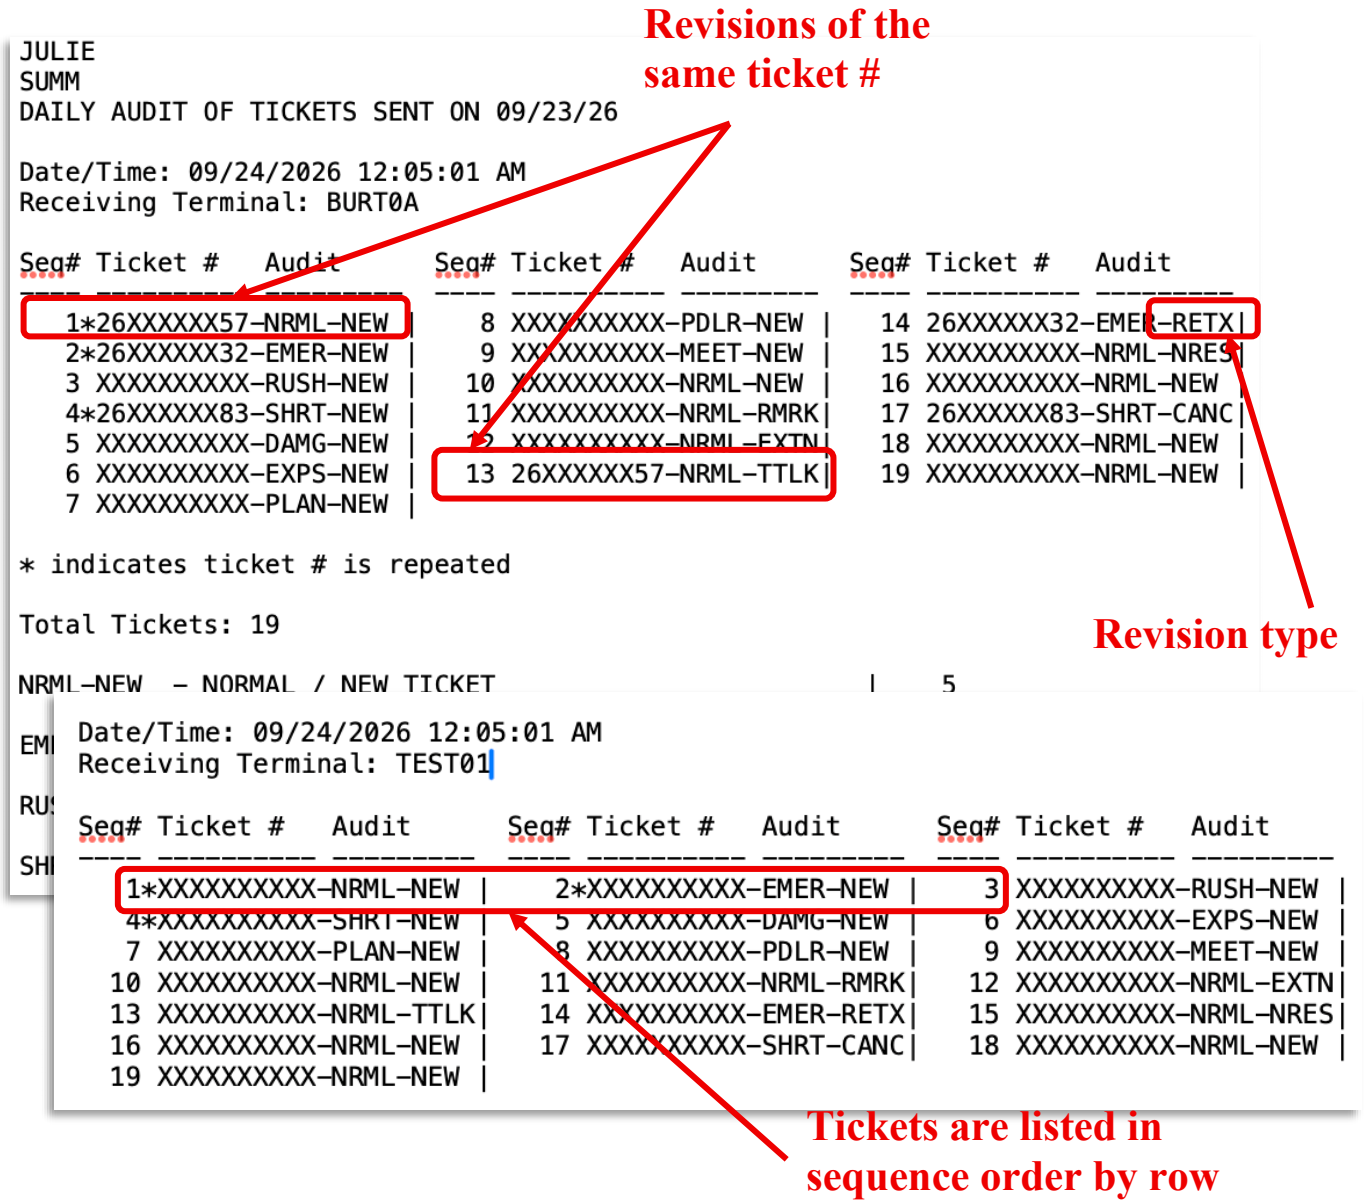

When receiving the TEXT format, you can choose to display audits with 1-3 columns, or as rows.

See the few pages for examples, options and description of End-of-Day Audits in the TEXT format.

Return to Top

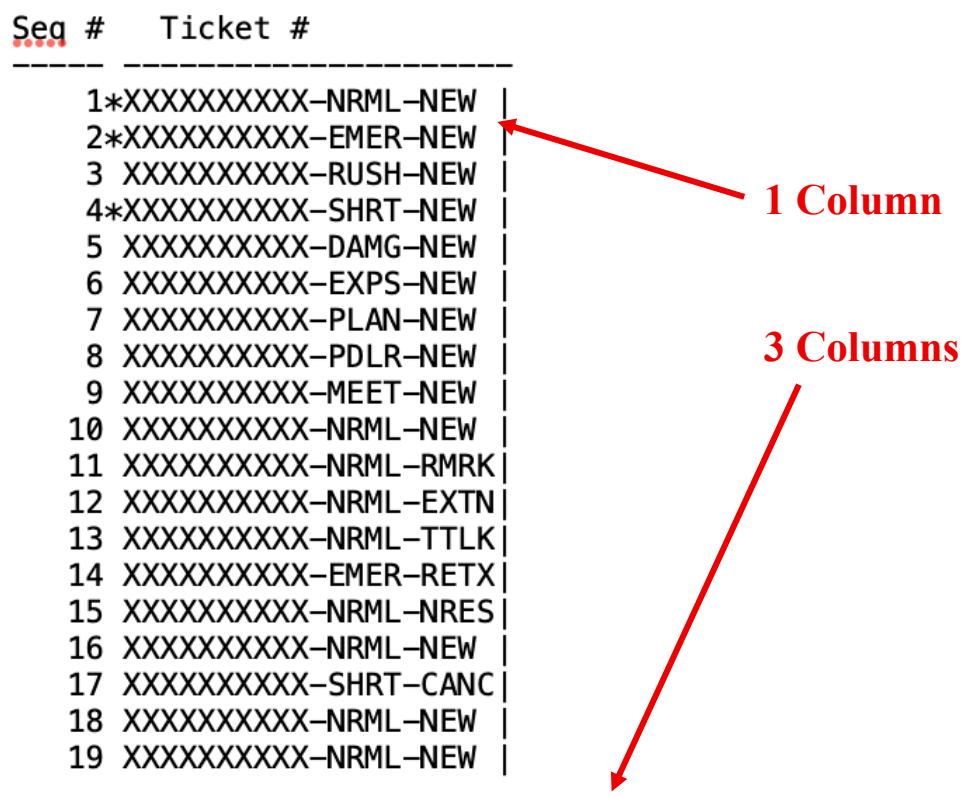

Return to Top

Using the TEXT format, you can also have the order changed to count the sequence numbers by row instead of by column.

Return to Top

You can change how many columns your audit ticket list displays (1-3) to ensure that your list is easy to understand.

Seq#	Ticket #	Audit	Seq#	Ticket #	Audit	Seq#	Ticket #	Audit
1*	26XXXXXX57	NRML-NEW	8	XXXXXXXXXX	PDLR-NEW	14	26XXXXXX32	EMER-RETX

EXAMPLE TICKET FORMAT: SMS

SMS | NORMAL | NEW TICKET

For members who currently receive tickets by text, nothing will change about receiving information. The ticket format is simple: just the district, the sequence number, and a direct link to see the ticket on the JULIE web application.

TEST01 Seq No: 2
https://julie.utweb.occinc.com/?TRG=6EIiKfIdGiFg8ge8f3

EXAMPLE TICKET FORMAT: STATUS EMAIL TO EXCAVATOR

STATUS EMAIL TO EXCAVATOR | NORMAL | STATUS

When a member utility or their contracted locator appends a Positive Response to a ticket, the excavator will receive an email notification. An example of the email can be seen below:

Ticket Number:	**2618300001**	**NORMAL**
Location:	123 STREET NAME PLACE NAME, IL	
Due By:	07/07/26 11:59 PM	

As of **7/09/26 08:14 CDT**, JULIE members have responded to Ticket Check as follows:

District Code	Company Name	Status	Comments
ABC01	MEMBER NAME 1	20 - Marked	
GT1	MEMBER NAME 3	50 - Locator and Excavator Agreed to a Documented Alternate Locating Schedule	AGREED ALTERNATE DATE AND TIME 07/10/26 10:00 AM. **Action required:** accept or decline this alternate locating schedule using the ticket link. If you do not respond by the scheduled start date and time, it is accepted automatically.

The following is the guide to the usage of the various statuses:

0 Not Yet Responded - the member has not yet provided a status.
10 No Conflict/Clear
20 Marked
21 Re-marked Not Needed
23 Reporting of an Exposed/Damaged Facility
30 Unable to Mark - DO NOT DIG

Return to Top

40 Locate Request Canceled
50 Locator and Excavator Agreed to a Documented Alternate Locating Schedule
51 Circumstances Beyond Reasonable Control
52 No Agreement Reached
60 Watch and Protect
90 Excavation Completed Prior to Dig Start Date
850 / 950 Accepted / Declined Code 50
851 / 951 Accepted / Declined Code 51
999 No Response - the status was not posted by the due date and time.

Use the ticket link https://julie.utweb.occinc.com/?TRG=6EliKfldGiFg8ge8f3 to review this ticket and each member's status, or to respond to a scheduling request.
